

Custom Lighting Control at the Touch of a Button

Simply Automated as a Stand-Alone System

Simply Automated lighting and control products work as a stand-alone system – no security panel required. Custom scenes (controlling up to 250 dimmers) in your living, family or great room, kitchen, study, master bedroom / bathroom and office. Turn off all the lights in your home at the touch of a button.

Automatically turn on/off outdoor, garden or security lights, heating and AC, or provide night light convenience anywhere in your home. From creating a virtual 3-way switch, to turning on a group of lights when your garage door is opened, door bell or phone rings, Simply Automated offers a vast array of simple and flexible solutions.

Eleven choices, five colors (white, almond, ivory, brown or black) and custom button labeling. Visit www.Simply-Automated.com to learn more!

About Simply Automated

Simply Automated, an industry leader in home automation and lighting control, offers the broadest, most cost effective, flexible assortment of lighting and home automation products in the market place.

No new wiring is required, making our products ideal for both new and retrofit construction. An extensive line of ultra-reliable UPB-based control modules, transceiver switches and in-wall controllers allow simple, low cost installations, and provide advanced applications not available in RF-based systems.

Lighting Automation and Control

"Honeywell Vista, Even More Powerful With UPB Lighting"

No New Wires
UPB Technology

Never Enter a Dark Home Again

Never Enter a Dark Home Again

Automatically turn on a light or group of lights by simply opening a door – front, rear or garage – to safely enter your home. One light, five lights, or more, allows a safe path inside or outside your home. You will never have to worry about entering your home in the dark again!

Simply Automated lighting and control products make the Honeywell Vista Security Panel even more powerful.

- **Works in conjunction with any sensor to turn-on lights, from door, window, to motion detector.**
- **Enhances an intrusion or panic alarm by adding flashing lights.**
- **In the event of a fire, automatically turns on lights at 50%, making it easier to see through the smoke, to allow a safe path out of the house.**
- **Includes lighting in energy saving and convenience solution with automatic control.**

Convenience and Safety

Automatically turn on/off security lighting – both outdoor and indoor. Set-up a night-light convenience pathway in hallways and bathrooms. Automatically turn on a light or group of lights when entering a room (in conjunction with a motion detector).

Break-In or Panic Alarms

Automatically turns on – can be set-up to flash – a light or group of lights when a break-in or panic alarm occurs. Flashing exterior lights work in conjunction with the audio alarm to alert neighbors and help police, EMS and fire fighters find your home faster.

Fire Alarm and Safety

In a fire, smoke can fill a room in minutes. Finding a safe way out in the middle of the night can be as difficult in bright light as it is in the dark. The Honeywell Vista security panel can send a message, detected by Simply Automated dimmers, to dim the lights at 50% in the event of a fire. Dimmed lights can make it easier to see through smoke, lighting a path instead of the smoke.

Energy Savings and Convenience

Saving Energy is easy and automatic with a Honeywell system and Simply Automated lighting and control products. Arming the security system when you leave home can automatically turn off lights and turns back a Honeywell VisionPro thermostat. When you return home and disarm the security system – lighting and temperature levels are automatically restored.

Get Started - Saving Today

Your local Honeywell Dealer can help you choose the desired options for your Honeywell Vista Security Panel, including keypads, thermostats and even IP camera options. For lighting, the basic starter package includes:

Basic Lighting Starter Package for Vista Security System, specify all three ADI models:
