

Model US2TP
Multi-Rocker/Button Tabletop Pedestal Base,
Transmits UPB Lighting Scene Links

FEATURES/BENEFITS

- **Pedestal Base Fits One of 13 Available Faceplates**
 - Snap on: single, dual, triple or quad (4) rocker faceplate, or choose a single or dual rocker and 4-button faceplate, or 4- or 8 button faceplates (faceplates sold separately).
- **Simple, Plug-in Installation**
 - Locate / relocate anywhere in the home: nightstand, study, entertainment room, kitchen, garage, etc...
- **Provides Remote ON/OFF and DIMMING Control**
 - Control UPB lighting and appliances with the push of a button
 - Turn on/off downstairs, outdoor, bed/bathroom and all lights
- **Create and Control Beautiful Lighting Scenes**
 - Each button can control an individual UPB device, or be linked to several UPB devices to create a lighting "scene" with unique preset light levels for each switch controlled
- **Manual scene-link changes with rocker/buttons**
 - Add or delete devices from scene with 7 or 8 taps
 - Adjust linked devices' light levels and save with 7 taps
- **Custom Labeling**
 - Custom label each button using the Model ZLK-01 Labeling Kit
 - Labels can be replaced if the Pedestal is reprogrammed
- **Available in Black or White**

DESCRIPTION

Model US2TP Tabletop Pedestal Controller Base is designed around the popular SimplyBrilliant US2 Series, Deluxe Dimmer Controller that has 13 field configurable faceplate options, available in six standard colors (white, almond, light almond, ivory, brown and black). Choose any one of the thirteen faceplate options, snap it on the pedestal, then configure with [UPStart](#) software to enable remote ON/OFF and dimming control of any UPB devices in the home.

With no new wiring or use of radio frequency signals, home owners now have the ability to control their UPB lighting wherever a power outlet is available. Beautiful indoor or outdoor lighting scenes or just basic safety and security lighting can be realized using the Tabletop Controller to activate UPB wall switches, plug-in modules and wire-in fixture modules.

Each button of the Tabletop Controller can be linked to a specific UPB device or control a lighting scene, such as outdoor garden or decorative-seasonal lighting. Label the buttons with the ZLK-01 label kit.

Manual scene-link modification capabilities are unique to Simply Automated devices. A user can easily change existing scenes, adding or removing devices and adjusting light levels, by pressing rockers/buttons in a specific sequence (see User Guide for details) without using UPStart.

APPLICATIONS

Model US2TP Tabletop Pedestal Controller is most frequently found on a bedroom nightstand and used to turn on lights quickly at the sound of something strange in the night. Turn on/off exterior security lights, downstairs lights, or all lights without getting out of bed.

With the Tabletop Controller Base just choose what lights need to be controlled and select a faceplate to match your need. The single rocker and 4-button faceplate (ZS25 series) is a popular choice, where the single rocker controls the room lights and buttons 1 through 4 might be used for: all on/off for the room, front exterior lights, rear exterior lights and all on/off for the house. If an extra rocker is needed to split room lighting, the dual rocker and 4-button faceplate (ZS26 series) can be used.

Imagine the devices that can be controlled (E.g. turned on/off, opened/closed, dimmed, blinked, timed-off, scheduled) with Simply Automated UPB devices and the Tabletop Controller: night lighting, fire-place/-pit, coffee pot, fountain, pumps, fans, garage doors, gate, pool/spa equipment, heaters, aquarium pumps and lights, and more...

The elegant design of the Tabletop Pedestal was made to complement the décor of any home. As a convenient entertainment room accessory or a nightstand necessity, the tabletop controller is an excellent addition to any UPB home automation solution.
