

Home Automation Made Simple.

Easily Connect Simply Automated Lighting to Any Alarm Panel with Low-Voltage or Contact Output Capability.

Powerful UPB powerline technology made simple-n-easy for the security panel dealer/installer. Manual programming. No PC required!

- Never enter a dark home again – automatically turn on lights when security panel is disarmed.
- Turns on lights in the event of an alarm -- fire, panic, intrusion -- or when front, rear or garage door is opened.
- Use security panel's RF remote to turn on lights!

Pre-Configured Dimmer Security Panel Starter Kit . Simple Plug-n-Play Installation. 1-2-3 Done!

Starter Kit (PN: DKIT-04SP) includes 2 single rocker dimmers and I/O Module.

Step 1: Install the 2 Simply Automated dimmers. Operate just like standard dimmer switches.

Step 2: Connect the low-voltage or contact outputs from security panel to one of the 3 low-voltage or 2 contact inputs of the Simply Automated I/O Module.

Step 3: Configure the security panel's output trigger functions to turn on/off the low-voltage or contact outputs for defined events (fire, panic, alarm, open door,...).

Simply Automated I/O Module Inputs: 1 = turn one light on/off; 2 = blink all lights on/off; 3 = turn all lights on/off

Easy Expansion. Up to 24 Additional Devices!

Simply Automated offers a full line of fully compatible plug-n-play starter kits and accessories for easy expansion. Choose from three additional Starter Kits (Security Panel Lamp, Dimmer, Lamp), accessory dimmers, lamp modules or tabletop pedestal.

- Ready to use lighting control.
- Create your own lighting levels and custom scenes.
- Manually programmable. No PC needed.
- Use Scheduler-Timer to ensure security lights are ON!
Also functions as computer interface module.

Simply Automated Products: A Powerful Stand-Alone Home Automation and Control System!

Feel the power of Simply Automated. Powerful custom expansion capability. Up to 250 dimmers/devices can be installed in one's home!

- Built-in energy saving timer automatically turns off lighting at intervals you pre-set!
- Scheduler-Timer turns on/off indoor or outdoor security lighting, water features, landscape lighting, night-time convenience (pathway) lighting.
- Control 120V appliances, heaters, fans, motors, or pumps.
